DETAILED ACTION

Allowable Subject Matter

Claims 1-6 and 8-28 are allowed.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record does not teach or suggest utilizing a turn on delay of a FET to provide wide operating range of current by reducing a duty cycle of a PWM current regulator in order to reduce thermal dissipation in a single PLC package.

Regarding claims 11 and 20, the prior art of record does not teach or suggest a drive circuit comprising a FET including a drain and a gate, an output circuit connected to the drain, a feedback amplifier connected to the gate and an error amplifier connected to the feedback amplifier and the gate, wherein the drive circuit is located within a current regulator of a programmable logic controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, with respect to Claims 11-28 have been fully considered and are persuasive. The rejection of claims 11-28 has been withdrawn.
